Services

What can I do?

Web Design

Designed responsive web applications using HTML,CSS and JavaScript,
increasing user satisfaction.

Web Development

Developed responsive web applications using HTML,CSS and JavaScript,
increasing user satisfaction.

Responsive Design

Optimized website performance by identifiying and refactoring inefficient code.

Branding Identity

Managed the software development life-cycle for a major project, ensuring timely delivery and meeting all project milestones.

Creative Design

Developed a personal portfolio website and design expertise

Support

Collaborated with a team of designers and back-end developers to create a customer-facing web application.

Projects

Netflix-Clone

A web application replicating Netflix's interface, developed using React and The Movie Database (TMDb) API for fetching movie data.
The project demonstrates skills in React, API integration, and responsive design.

Amazon-Clone

An e-commerce website clone of Amazon, built using React, Stripe for payment integration, Firebase for back-end services, and REST API for image handling.
